Chemical compound:	COD	EN 16523-1:2015 TYPE B		EN 374-4:2013
		Performance level	Breakthrough time	% degradation
Sodium hydroxide 40%	K	3	>60'	41,3%
Hydrogen peroxide 30%	P	2	>30'	70,6%
Formaldehyde 37%	T	2	>30'	56,3%

RISKS FROM WHICH THE DPI IS DESIGNED TO PROTECT:

COD		Protection
K Sodium hydroxide 40%	CAS:1310-73-2	Protection from use of inorganic bases
P Hydrogen peroxide 30%	CAS: 7722-84-1	Protection from use of peroxides
T Formaldehyde 37%	CAS: 50-00-0	Protection from the use of aldehydes

RECOMENDATIONS OF USE Multi-purpose glove to protect the hand and/or the handled product, can also be used for general uses ■ The glove is suitable for contact with pure chemical products for a period of less than the permeation time indicated in the chemical resistance table ■ Results obtained under laboratory conditions may not reflect actual working time

WARNINGS This informative does not reflect real chemical resistance and penetration resistance which have been laboratory tested from samples taken from the palm only (except in cases where the glove is 400mm or more in length - where the cuff is also tested) and refer only to the tested sample. It may be different if the chemical is used in a mixture ■ It is recommended to check that the gloves are suitable for the intended use as the conditions at the workplace may differ from the test depending on the temperature, abrasion and degradation ■ If used, protective gloves may provide less resistance to the hazardous chemical due to changes in physical properties. The movements, entanglement, rubbing, deterioration caused by chemical contact, etc. can significantly reduce the actual usage time. For corrosive chemicals, degradation is the most important factor to consider when selecting chemical resistant gloves ■ Before using the product, try it in the real condition of use ■ The glove is a device subject to wear, so frequent replacement is recommended and in all cases where imperfections are observed ■ Wear gloves with dry, clean hands ■ In rare cases where transient hypersensitive skin reactions may occur, discontinue use and consult a doctor ■ The user must inform the manufacturer and the relative authority of any incidents occurring during the use of the protective equipment

STORAGE AND DISPOSAL Store the gloves in their original packaging in a dry place. ■ Do not expose to direct sunlight and heat sources. ■ The expiry date is 3 years from the date of manufacture indicated on the sales package, and is valid for the product properly stored ■ Gloves must be disposed of according to local regulations ■ Declaration of Conformity on www.reflexx.com
